

	ENVIRONMENTAL PERFORMANCE OF THE ORGANIZATION	Date: 04/24/2017
--	--	----------------------------

Centunion is a company committed to the environment. This is the reason why it maintains an integrated quality and environment system compliant with the ISO 9001 and ISO 14001 standards. As established in the regulation, the firm has an integrated quality and environment policy in place and the entire system is revised on an annual basis. A summary of the environmental performance in 2016 is shown below:

Kg of paper

Paper consumption is linked to ongoing projects. If the organization is developing projects, consumption increases. Despite a greater number of projects in 2016 compared to 2015, a reduction of almost 12% was achieved in 2016. The reason behind that can be found in a greater awareness of people towards the benefits of double-sided printing and reuse of paper.

Kwh of Electricity

A reduction of 3.07% was achieved in 2016 compared to 2015. While the reduction target of 5% has not yet been reached, we are on the right track.

Number of toner cartridges.

Toner consumption is linked to ongoing projects. If the organization is developing projects, consumption increases. Right now the activity is restless compared to 2015, which has resulted in an increase of 69%.

Kg of batteries:

In 2016, approximately 3 kg of batteries were collected, the same number of removals recorded in 2015.
