

	<b>ENVIRONMENTAL PERFORMANCE OF THE ORGANIZATION</b>	<b>Date:</b> 01/09/2022
---	--	----------------------------

**Centunion** is a company committed to the Environment, which is why it maintains an Integrated Quality and Environment System according to ISO 9001:2015 and ISO 14001:2015 standards. As marked by the standard, it has an Integrated Quality and Environment Policy, and annually they review the entire system.

Below is a summary of environmental performance for the period 2021-2022

**Kwh Electricity**

In the 4th quarter of 2021, there was an increase of 21%. In the first quarter of 2022, consumption increased by 14%. In the second quarter of 2022 consumption increased by 28%. In the third quarter of 2022 consumption increased by 27% compared to the same quarter of the previous year. These changes are due to times when due to the pandemic, we have been teleworking or face-to-face working in the office, depending on how the pandemic evolved.

**Number of toner cartridges**

Toner consumption is linked to ongoing projects. If the organization is in project development, consumption may increase. In the second half of 2021 it was reduced by 46% and in the first half of 2022 consumption was reduced by 29%. This decrease in consumption is since we are in the final stage of the development of a project, which reduces the number of copies and documents generated.

**Water consumption**

During the fourth quarter of 2021, consumption increased by 23%. In 2022, the first quarter consumption increased by 31%, during the second quarter it increased by 19%, and during third quarter consumption remains stable with a slight increase of 4%.

**Kg of Paper**

During the second half of 2021, there was a decrease in paper consumption of 32% compared to the same period of the previous year 2020. In the first half of 2022, paper consumption decreased by 16%, coinciding with the development of new projects, when the number of copies decreases.
